## Product from the Archive - production finished

### Pro-Active Protection:

eScan-10 Scans, detects, Monitors & warns about changes in registry. It also warns about the applications suspicious in nature.

### Inbuilt Firewall:

Advanced Firewall saves system from all network-based attacks.  
Monitors & logs incoming/outgoing network activities in the system.

### Faster on demand scanning:

Faster scans & lighter on system resources: New "On Demand Scanner" with Cache Technology. Also scans USB drives, Spyware & Adware.

### Real-Time AntiVirus, Email Scanning:

Scans files, applications, e-mails and attachments including SMTP and POP3 traffic in Real-Time for Viruses, Worms, Trojans, Spyware, Adware, Keyloggers, Rootkits & all other kinds of security threats using the unique MWL Technology and advanced AntiVirus Heuristic Algorithms.

### **eScan Remote Support**

eScan Remote Support (ERS) works with the help of remote desktop connection which enables eScan Support technicians to access computers with problems from a remote location and troubleshoot them directly. This helps in providing secure, faster and better support worldwide and also increases efficiency.

### **eScan Auto Back-up / Restore**

eScan Auto Back-up / Restore utility takes back-up of all the frequently used files (PE files) and stores it in an encrypted form. If an infection is found, eScan's Auto Back-up / Restore utility will restore back all the clean files in real-time without the need to format the system.

### **Updates:**

Automatic hourly Program as well as Definitions Updates protect against any latest threats.

Novice or expert users! Both can navigate the New Graphical-User-Interface with ease. A Single-screen-access to both, the Virus-Monitor & On Demand Scanner.
