Product from the Archive - production finished

eScan Internet Security suite is a comprehensive AntiVirus and Content Security solution that defends your computer or system from Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers, Phishing, Objectionable content and many more similar threats.

New User Friendly GUI:

Novice or expert users! Both can navigate the New Graphical-User-Interface with ease. A Single-screen-access to both, the Virus-Monitor & On Demand Scanner.

Pro-Active Protection:

eScan v10 scans, detects, monitors & warns about changes in registry. It also warns about the applications suspicious in nature.

Parental Control :

All incoming /outgoing emails, attachments & websites are scanned for confidential data. Prohibited content, offensive and obscene language using specific keywords and phrases are also well scanned, using NILP, RBL and SURBL technologies.

Endpoint Security:

No data-thefts, virus infections through USB/Fire-wire based portable devices (Flash drives, Pen drives, Portable Hard Disks etc.)

Application Control:

Block/Permit applications on networks/PCs.

Inbuilt Firewall:

Advanced Firewall saves system from all network-based attacks. Monitors & logs incoming/outgoing network activities in the system.

Faster on demand scanning:

Faster scans & lighter on system resources: New "On Demand Scanner" with Cache Technology. Also scans USB drives, Spyware & Adware.

Real-Time AntiVirus, Email, Web/ FTP/ CHAT Scanning:

Scans files, applications, e-mails, attachments and websites including SMTP,POP3, HTTP and FTP traffic in Real-Time for Viruses, Worms, Trojans, Spyware, Adware, Keyloggers, Rootkits & all other kinds of security threats using inventive MWL Technology and AntiVirus Heuristic Algorithms.

Updates:

Automatic hourly Program as well as Definitions Updates protect against any latest threats.

FREE 24x 7 online technical support:

Free telephonic and online technical support (via email, chat and forums) is provided round the clock.
