Chainway P100 - Rugged rubber boot

The reinforced rubber boot (Rugged Rubber Boot) provides a reliable shield for the tablet. It absorbs shock and protects the device from drops and heavy impacts, ensuring compliance with durability standards. This minimizes the risk of failure and costly repairs, which is crucial in demanding work environments. Its ergonomic design significantly improves grip, preventing accidental slippage, even with wet hands or gloves. This ensures the tablet maintains full operational efficiency and reliability while extending its lifespan.
