Chainway P100 - Shoulder strap kits including fixed parts

Transform your tablet into a mobile workstation with shoulder straps. These straps allow you to carry your device on your body like a bag or hang it, providing hands-free, secure access to your tablet. This solution is invaluable in logistics, field inspections, and anywhere mobility and the use of both hands for physical work are required. The straps are designed to evenly distribute the tablet's weight, ensuring comfortable use even throughout an entire shift.
