AVAILABLE VERSIONS

Small dimensions computers are at the forefront in environments where dust, dirt and moisture predominate. They are ideal for applications requiring quiet operation. The rugged mini mBOX-Q610S is a device designed for all home, office and other uses requiring continuous operation - 24 hours, 7 days a week.

Small dimensions

The compact housing means that the Mini PC will fit wherever you need it and is easy to carry.

Lightweight design

The computer's weight does not exceed 2.5kg, so it can be conveniently carried in a bag or backpack.

Efficient components

The Intel Celeron dual-core CPU provides improved device performance.

Wireless network

The mini PC can be connected to nearby wireless networks by equipping it with a Wi-Fi module.

Quick start *

A modern SSD drive will increase the speed of application programs and ensure quiet computer operation.

Cooling

The use of fan cooling in the Mini PC ensures quiet operation of the device.

EFFICIENT PROCESSOR

The mini-computer mBOX-Q610s uses an efficient and energy-saving Intel Celeron processor. Inside it there are four cooperating cores enabling more efficient processing of many tasks at the same time. The shared cache memory in which the multilevel hierarchy is used is dynamically allocated to each processor core depending on the load. This reduces the average access time to the main memory.
