Operator Panel Digital Singage Player MobiPad 101HDY has a scratch resistant LED screen. With 1080x800 resolution and high brightness of 350cd/m2, screen of capacitive type with high sensitivity to touch, offers the user a clear picture and ease of use.

Capacitive screen

Operation of this type of screen is a bit more complex than the resistive screens, but the comfort of their use is much higher. In the corners of the screen capacitive electrodes are placed emitting weak electric field. If you touch the display, the intensity produced before the field changes, and the system will calculate respectively, where the disturbance occurred.

The image on the capacitive screen is clearly visible both indoors and outdoors. Particularly noteworthy here precise
