Product from the Archive - production finished

Recertified to spec then discounted DocuPen R700, a Monochrome handheld scanner that operates on batteries for full portability purposes. The DocuPen is capable of storing up to 100 pages into memory and takes approximately 4 to 8 seconds per page. The DocuPen is different from other pen scanners in that it scans a FULL PAGE width and therefore scans the entire page including text and graphics in just 4 seconds. Other handheld and pen scanners only scan single lines of text or records handwriting and cannot scan graphics making them much less practical.

In comparison, the DocuPen? is truly a breakthrough in technological development because it fully realizes the potential of what other pen size scanners tried to accomplish. The need for convenient out of office scanning is enormous but has not been satisfied because the products to date did not fulfill that need adequately. As the fax evolved from the telex, to successfully satisfy its communication need, the DocuPen? is the practical solution to the pen scanners finally opening the market for wide spread acceptance.
