Detailed device specification is available in the "Technical data".

The dustproof industrial tablet uses an efficient and energy-saving ARM. This unit uses hybrid technology with Performance and Efficient cores, ensuring high performance at low energy consumption. Advanced cache memory management and dynamic allocation of resources to individual cores increase data processing efficiency and shorten the device's response time. The tablet is ideal for technical and service applications, and the modern CPU architecture allows work in demanding field conditions, while maintaining a

long battery life.

Ergonomic design

The Emdoor Q885M waterproof tablet is built for durability and comfort. The slim and durable casing and stylish design make the tablet perfect for industrial and field use. The compact size has been carefully thought out to make the rugged tablet handy and ergonomic. The non-slip surface makes this durable tablet feel secure in your hand, while reinforced corners increase resistance to drops and impacts, protecting the device from damage.

Capacitive screen

In the capacitive screen of the resistant EMDOOR Q885M tablet, the device's reaction is not based on direct pressure on the surface, but on detecting changes in the electrostatic field at the point of touch. This solution allows for exceptionally precise and delicate operation even with a light touch. Additionally, the multitouch technology used allows for the simultaneous use of multiple touch points, which increases the comfort of work and allows for intuitive operation of the shock-resistant tablet with several fingers at the same time - even when wearing work gloves.

Connectors and buttons

The POGOPIN connector allows you to quickly connect a military tablet to the docking station.

DATA COLLECTING

Barcode scanner (optional)

The barcode reader installed in the warehouse tablet allows you to read, decode and send data stored in the barcode to the computer. Thanks to its dynamic scanning capabilities and wide reading range, the mobile industrial tablet accurately collects data, which helps increase work speed and efficiency. The whole thing can be launched quickly, because thanks to the simplified installation procedure and intuitive, convenient design, preparing the scanner for work is very easy.

RESISTANCE

IP65 Protection

The IP65 standard, which this special-purpose tablet meets, determines the degree of protection provided by the device's housing against factors such as: access to hazardous parts inside the housing, ingress of solid foreign bodies, and splashes or jets of water from any direction. The Emdoor Q885M industrial tablet, thanks to its compliance with the IP65 standard, will work well both inside industrial halls and outside - regardless of weather conditions.

IP6X

Protection against access to hazardous parts with wire.
Dustproof protection.

IPX5

Protection against water jets (12.5 l / min) poured on the housing from any side

MIL-STD 810 Standard

MIL-STD-810 is a military standard for resistance, used by the US Army, among others, which determines the resistance of equipment to harsh environmental conditions. The specialized Emdoor Q885M tablet meets this standard, which means it is resistant to shock, drops, vibrations, high and low temperatures, moisture and dust. Although this standard was originally developed for military equipment, it is successfully used today in industry, logistics and mobile service and automation systems.

1.22m drop resistance

The specially designed, reinforced structure of the Emdoor Q885M logistics tablet provides resistance to accidental drops from a height of up to 1.22 meters in working mode - even on hard surfaces. The device meets the rigorous requirements of the MIL-STD-810G standard, which confirms its durability in industrial and field environments.

Extreme temperatures

Designed for field work, the Emdoor Q885M tablet is designed for continuous operation in both very low and high temperatures ranging from -20°C to 60°C. When the device is stored switched off, it can handle temperatures ranging from -30°C to 70°C. Additionally, the durable industrial tablet works great in rooms with increased humidity, ensuring proper operation even at 95% relative humidity.

WIRELESS COMMUNICATION

GPS Navigation

The Emdoor Q885M waterproof industrial tablet is equipped with a precise GPS module, which combines low power consumption with high location accuracy. Navigation works quickly and stably, enabling effective positioning in the field and safe navigation even in difficult industrial and outdoor conditions.

Bluetooth 5.2

The modern Bluetooth 5.2 module enables energy-efficient short-range communication with other devices such as printers, keyboards, RFID readers, scanners or headphones. This technology offers higher connection stability and speed compared to earlier versions, while reducing energy consumption.

Wi-Fi network

The professional Emdoor Q885M tablet supports dual-band Wi-Fi 802.11 a/b/g/n/ac, operating in the 2.4GHz and 5.8GHz ranges. This allows for quick access to local networks and the Internet both in the office and in the field, ensuring high stability and data transmission capacity.

Standards	802.11(a/b/g/n/ac)

NFC

NFC (Near Field Communication) technology is a short-range wireless communication standard that enables data exchange over a distance of a few centimeters. Tablet for wholesalers - Emdoor Q885M can be optionally equipped with a 13.56 MHz NFC module, compliant with ISO / IEC 14443A/B and ISO15693 standards. NFC will work in applications such as: access control, employee authorization, logistics or payment acceptance. The modern industrial tablet enables tag reading and cooperation with smart card systems with a range of up to 2-4 cm.

5G

The built-in 5G module provides fast and stable access to the cellular network, even in demanding

APPLICATION

Trade and Services

Thanks to its multifunctionality and simple operation, the drop-proof Emdoor Q885M tablet is an ideal tool for sales and field representatives. Modern mobile applications enable quick data collection, verification of contractors, presentation of offers and generation of sales documents. The tablet for the warehouse allows for issuing invoices, creating orders and synchronizing data with the ERP system in real time - regardless of location, thanks to access to the GSM or Wi-Fi network.

Industry and Construction

Industrial tablets adapted to harsh working conditions, such as the Emdoor Q885M, are characterized by exceptional resistance to unfavorable working conditions. The dust- and waterproof housing confirmed by the IP65 certificate, as well as compliance with the MIL-STD-810G standard, allow for safe use of the solid tablet in places with increased humidity, dustiness, on construction sites and in industrial halls. Thanks to appropriate mobile

applications, the waterproof tablet can act as a tool for supervising work, collecting data from the construction site and managing technical infrastructure and human resources.
