Detailed device specification is available in the "Technical data".

This drop-resistant tablet features a powerful and energy-efficient MediaTek MT6789 processor, ensuring smooth and stable operation even in demanding

conditions. Thanks to its modern architecture, the system is perfectly suited to technical, service, and field applications.

The processor combines high processing power with low energy consumption, resulting in longer battery life and reliability in everyday use. This rugged tablet with this processor is the ideal tool for work in the field, warehouse, or industrial facility.

Ergonomic design

The Emdoor T17X tablet for uniformed services was created with durability and comfort in mind. Its slim and durable casing and stylish design make it ideal for

industrial and field use. The compact size was carefully considered to ensure the rugged tablet is both handy and ergonomic. The non-slip surface ensures this modern tablet fits securely in the hand, while reinforced corners increase resistance to drops and impacts, protecting the device from damage.

Capacitive screen

The capacitive screen of the EMDOOR T17X tablet doesn't respond to direct

pressure on the surface, but rather detects changes in the electrostatic field at the point of touch. This solution allows for exceptionally precise and sensitive operation, even with a light touch. Additionally, the multitouch technology allows for simultaneous use of multiple touch points, increasing work comfort and enabling intuitive operation of the shock-resistant tablet with multiple fingers simultaneously – even while wearing work gloves.

Connectors and buttons

RS232 **USB 2.0**
Selection 1 of 3

The splash-resistant Emdoor T17X tablet offers a set of essential ports and connectors essential for work in industrial plants and construction companies. Thanks to its modular design, the device can be expanded with additional features such as RS232, USB 2.0, or RJ45, adapting to the needs of a specific industry.

The extremely durable Emdoor T17X features a set of physical buttons (volume, home, power, and one programmable button). The back of this functional tablet is protected by a reinforced casing, a battery lock, and an NFC module.

pogo pin interface

The POGOPIN connector allows you to quickly connect a military tablet to the docking station.

DATA COLLECTING

Barcode scanner

A barcode reader installed in a warehouse tablet allows for reading, decoding, and transmitting data stored in barcodes to a computer. Thanks to its dynamic scanning capabilities and wide reading range, the mobile service tablet accurately collects data, helping to increase work speed and efficiency. The entire system can be quickly deployed, as the simplified installation procedure and intuitive, user-friendly design make setting up the scanner very easy. Integrated versions use the Motorola SE4710 module.

NFC

NFC 13.56MHz

Emdoor

NFC (Near Field Communication) technology is a short-range wireless communication standard that enables data exchange over a distance of a few centimeters. The Emdoor T17X wholesaler tablet is equipped with a 13.56 MHz NFC module, compliant with ISO/IEC 14443A/B, ISO15693, and ISO 18092 standards. NFC is suitable for applications such as access control, employee authorization, logistics, and payment acceptance. A modern tablet for uniformed services such as the police, border guard, fire department, and municipal guard – it enables tag reading and compatibility with smart card systems with a range of up to 2-4 cm.

RESISTANCE

IP65

The IP65 standard, which this rugged, heavy-duty tablet meets, determines the degree of protection provided by the device's housing against factors such as access to hazardous parts inside the housing, ingress of solid foreign objects, and splashes or jets of water from any direction. Thanks to its IP65 compliance, the Emdoor T17X military tablet is suitable for both indoor and outdoor use, regardless of weather conditions.

Firts digit	Protection level	Second digit
No special protection	0  0	No special protection
Protection from solid objects greater than 50mm in diameter	1  1	Protection from dripping water

Firts digit	Protection level	Second digit
Protection from object not greater than 12mm in diameter		Protection from vertically dripping water (tilted up to 15°)
Protection from object not greater than 2,5mm in diameter		Protection from sprayed water (tilted up to 60°)
Protection from object not greater than 1mm in diameter		Protection from splashed water
Complete protection against contact, Protection against dust deposit		Protection from water projected from a nozzle
Complete protectionm against contact, protection from infiltration of dust		Protection against heavy seas, or powerful jets of water
		Protection against immersion
		Protection against complete, continuous submersion in water

Fall to 1.22 m

The specially designed, reinforced structure of the Emdoor T17X logistics tablet ensures resistance to accidental drops from a height of up to 1.22 meters in operating mode – even onto hard surfaces. The device meets the stringent requirements of the MIL-STD-810H standard, confirming its durability in industrial and field environments.

Extreme temperatures

Designed for field work, the Emdoor T17X tablet is designed for continuous operation in both very low and high temperatures ranging from -20°C to 60°C. When stored turned off, the device can handle temperatures ranging from -30°C to 70°C. Additionally, this industrial production tablet is ideal for use in rooms with high humidity, ensuring proper operation even at 95% relative humidity.

WIRELESS COMMUNICATION

GPS Navigation

The waterproof Emdoor T17X tablet is equipped with a precise GPS module that combines low power consumption with high location accuracy. Navigation is fast and stable, enabling effective field positioning and safe navigation even in challenging industrial and outdoor environments.

Bluetooth 5.2

The modern Bluetooth 5.2 module enables energy-efficient, short-range communication with other devices such as printers, keyboards, RFID readers, scanners, or headphones. This technology offers higher connection stability and speed than previous versions, while reducing power consumption.

Wi-Fi network

The professional Emdoor T17X tablet supports dual-band Wi-Fi 802.11 a/b/g/n/ac, operating in the 2.4GHz and 5.8GHz bands. This enables fast access to local networks and the internet both in the office and in the field, ensuring high stability and data throughput.

Industry and Construction

Designed for harsh working conditions, construction tablets like the Emdoor T17X are exceptionally resistant to unfavorable working conditions. The dust- and waterproof housing, certified by IP65, and compliance with the MIL-STD-810H standard, allow for safe use of this robust tablet in areas with elevated humidity and dust levels, as well as on construction sites and industrial halls. With appropriate mobile applications, the waterproof tablet can function as a tool for supervising work, collecting data from the construction site, and managing technical infrastructure and human resources.
