Detailed device specification is available in the "Technical data".

The Emdoor X14A industrial laptop is powered by the energy-efficient Intel Core i7-1255U processor, delivering high performance. The chip features ten cooperating cores, enabling smoother multitasking and faster data processing. Its multi-level shared cache is dynamically allocated to each core depending on the workload, reducing average memory access time and improving overall efficiency.

Ergonomic design

The rugged Emdoor X14A tablet is designed for challenging environments – from production halls to open construction sites. Its IP65-certified housing protects components from dust and water, while reinforced seals absorb shocks and withstand drops from up to 1.5 meters. Non-slip edges and strengthened corners ensure a secure grip, making this tablet a reliable tool for demanding fieldwork.

Connectors and buttons

The versatile Emdoor X14A industrial laptop comes with a well-designed set of interfaces, allowing seamless connection of various accessories and peripherals. Available ports include USB-C, USB 3.2, HDMI, a 3.5 mm audio jack, as well as a SIM card slot and an RJ-45 connector, making this notebook an excellent tool for both office and field operations.

RESISTANCE

IP65 protection class

The rugged Emdoor X14A laptop is built for demanding environments. Its IP65-certified design ensures complete protection against dust and resistance to temporary water immersion. This reliable industrial notebook is the perfect solution for industries where durability and resistance to harsh conditions are crucial.

First digit	Protection level	Second digit
No special protection	0  0	No special protection
Protection from solid objects greater than 50mm in diameter	1  1	Protection from dripping water
Protection from object not greater than 12mm in diameter	2  2	Protection from vertically dripping water (tilted up to 15°)
Protection from object not greater than 2,5mm in diameter	3  3	Protection from sprayed water (tilted up to 60°)

First digit	Protection level	Second digit
Protection from object not greater than 1mm in diameter		Protection from splashed water
Complete protection against contact, Protection against dust deposit		Protection from water projected from a nozzle
Complete protection against contact, protection from infiltration of dust		Protection against heavy seas, or powerful jets of water
		Protection against immersion
		Protection against complete, continuous submersion in water

MIL-STD 810 Standard

The durable and rugged Emdoor X14A laptop meets the MIL-STD-810H standard, used by the U.S. Army, ensuring resistance to harsh environmental conditions. With mechanical durability proven by tests (1.5 m drop resistance), this laptop is perfectly suited for demanding industrial and field operations, providing reliability even in extreme scenarios.

Extreme temperatures

The rugged Emdoor X14A field laptop is designed for demanding conditions and operates reliably in temperatures ranging from -20°C to 60°C . When stored while powered off, it withstands -30°C to 70°C , ensuring durability and stability even in extreme environments.

WIRELESS COMMUNICATION

GPS Navigation

The waterproof and durable Emdoor X14A laptop is equipped with a precise GPS module that combines low power consumption with high positioning accuracy. This rugged field laptop enables fast and stable location tracking, ensuring safe navigation in challenging industrial and outdoor conditions while significantly improving work efficiency in the field.

Bluetooth 5.1

The modern and functional Emdoor X14A laptop is equipped with

Bluetooth 5.1, enabling energy-efficient short-range communication with devices such as printers, keyboards, RFID readers, scanners, and headsets. This powerful mobile laptop delivers higher connection stability and speed compared to previous versions while reducing power consumption, enhancing both comfort and efficiency in field operations.

Wireless Wi-Fi

The professional Emdoor X14A laptop supports dual-band Wi-Fi 802.11 a/b/g/n/ac, operating in the 2.4 GHz and 5.8 GHz ranges. This ensures fast and stable access to local networks and the Internet both in the office and in the field, with data transmission speeds reaching up to 9.6 Gbps theoretically.

Standards	WiFi 6 802.11(a/b/g/n/ac)
Frequencies	2.4GHz/5.8GHz (Dual-Band)

NFC communication

(optional)

NFC (Near Field Communication) technology is a short-range wireless communication standard that allows data exchange over just a few

centimeters. NFC is ideal for applications such as access control, employee authentication, logistics, and payment processing. The modern industrial Mobipad tablet enables tag reading and integration with smart card systems.

APPLICATION

Trade and Services

The rugged and functional Emdoor X14A laptop is an ideal tool for sales and field representatives. With modern business applications, it enables fast data collection, client verification, offer presentation, and the creation of sales documents. This mobile warehouse laptop allows issuing invoices, creating orders, and synchronizing data with the ERP system in real time, regardless of location, thanks to GSM or Wi-Fi connectivity.

Industry and Construction

The rugged and waterproof Emdoor X14A laptop features dust and water resistance (IP65 certification), enabling safe use in industrial halls, construction sites, and challenging environments. With modern business applications, this practical field laptop is ideal for work supervision, data collection, and managing infrastructure and human resources.

The powerful and rugged Emdoor X14A industrial laptop is ideal for automotive service centers and workshops. Its durable design, along with Wi-Fi, and GPS connectivity, assists technicians in rapid vehicle diagnostics, analysis of onboard system data, and handling service documentation. Installing specialized software allows for error reading, vehicle system configuration, and access to diagrams and repair history, significantly improving work efficiency and accuracy.
