

i-Mobile AP-10 - Standard battery (additional)

Category: Batteries

Product from the Archive - production finished

Image not found or type unknown

A thin 3400mAh removable li-Ion battery acts as the back of the i-Mobile. Power management is impressively optimized, as a single charge (3.5 hours for 85% charge, 5 hours for full charge) provides up to 6 hours of operational time. Actual runtime varies according to usage and settings, of course, but the estimates are pretty accurate.
