### Efficient processor

The industrial mini-computer IBOX 4211N uses an efficient and energy-saving Intel Celeron N100 processor. Inside it there are four cooperating cores enabling more efficient processing of many tasks at the same time. The shared cache memory in which the multilevel hierarchy is used is dynamically allocated to each processor core depending on the load. This reduces the average access time to the main memory.

## Interfaces

## Dimensions

Thanks to the small dimensions of the MiniPC, it is versatile for use at home, in the office and in the industry, for example in the production hall. It's literally everywhere, and thanks to the VESA mount it can be mounted on the back of the monitor to optimize the job.

<b>Dimensions</b>	144 x 136.7 x 42 mm
<b>Weight</b>	790g

Passive cooling

The industrial Mini PC uses a proven cooling system, based only on solid elements, mainly heat sink

## RESISTANCE AND DURABILITY

## Temperatures

IBOX

4211N

is designed for continuous operation in both very low and high temperatures ranging from  $-20^{\circ}\text{C}$  to  $50^{\circ}\text{C}$ . If the device is switched off, it can already handle temperatures in the range of  $-20^{\circ}\text{C}$  to  $50^{\circ}\text{C}$

<b>Work temp.</b>	$-20^{\circ}\text{C}$ do $50^{\circ}\text{C}$
<b>Humidity</b>	0% to 95%

## Mechanical damage

The passive cooling system used in the MiniPC IBOX 4211N combined with the SSD M.2 drive make this computer very resistant to various types of mechanical injuries. An additional advantage of industrial computers is a solid construction made of high quality aluminum and specially designed in such a way that in addition to high efficiency in heat dissipation, it can also resist any external damage.

## CONNECTIVITY AND COMMUNICATION

### Wireless network (WiFi6) ( option)

The Wi-Fi module

provides quick access to the network wherever you can connect to secured or open Wi-Fi networks. This is a convenient solution for people who have a router at home or place of residence and a wireless network that can be used at no extra charge. Industrial mini-PC IBOX 4211N has been equipped the standard of - Intel-AX210(M.2) Module , which allows transfer of files at a dizzying speed of up to 800 Mb / s.

### Wired LAN Network

The MiniPC IBOX 4211N has built-in Intel network adapter that can work in a fast Gigabit Ethernet network.

## DEVICE APPLICATION

### Trade and service

Mini PC is an ideal tool to support us in the implementation of many activities in the field of trade, small dimensions increase the possibility of its adaptation to activities such as issuing invoices or preparing documentation, which in turn allows us to convenient and optimal sales management. The VESA holder mounted to the housing provides many installation options, eg in stores (at the cash register, under the desktop, behind the LCD / LED monitor), in factory halls or in a delivery truck.

## Warehouse and logistics

Thanks high performance an industrial computer can be used to connect multiple devices in a warehouse and make their management much easier. Its rugged casing and the fanless cooling system are ideal for harsh environments in such rooms. The solid construction guarantees long-lasting work, even in environments with high dustiness and dirt.

## Transport and motorization

A small industrial computer can be used in transport thanks to the ability to work on 12V power supply. Then the mini computer can be used in passenger cars, buses, trams, taxis, trains and even in airplanes. It allows you to inform the driver about the current state of the vehicle, transfer its current location to the management center, display information for passengers, etc. It performs well in vehicles where small dimensions are important.
