

Laptop - P370EM3 (3D) v.0.1

Category:	CLEVO Powerful Notebooks
Manufacturer:	Clevo
WAN:	No
WLAN:	Yes - 802.11 b/g/n
Bluetooth:	Yes - 3.0 + EDR
Processor:	-----
Memory:	-----
Chipset:	Mobile Intel® HM77 Express
Display:	17.3 FHD/ GT 120Hz (1920*1080) 3D Panel 16:9 Widescreen - Built-in 3D IR emitter MATT
Graphics card:	2x (SLI) Nvidia GeForce GTX-680M (N13E-GTX) 4GB
Touch screen:	No
Swivel Hinge:	No
Hard Drive:	-----
BIOS:	-----
VGA out:	Yes - HDMI , Display Port
LAN:	Realtek RTL8411 10/100/1000Mb Base-TX Ethernet LAN
Camera:	Yes - 2.0 MPx FHD

Audio:	Tak - External 7.1 CH, Embedded 2.1 CH // Creative SoundBlaster SB X-Fi MB2, THX TruStudio Pro
Security:	Yes - Fingerprint, TPM1.2
TV Out:	HDMI + Display Port
In/Out:	USB 2.0 port, 4x USB 3.0 ports (1 x powered USB port, AC/DC), eSATA port (USB 2.0 combo), Display port (Reversion depends on Video Controller), HDMI™ output port (with HDCP), Headphone jack, Microphone jack, S/PDIF output jack, Line-in jack, RJ-
In/Out:	USB 2.0 port, 4x USB 3.0 ports (1 x powered USB port, AC/DC), eSATA port (USB 2.0 combo), Display port (Reversion depends on Video Controller), HDMI™ output port (with HDCP), Headphone jack, Microphone jack, S/PDIF output jack, Line-in jack, RJ-
Keyboard:	QWERTY
Additional Navigation Devices :	Yes - Touchpad
Battery:	Lithium-Ion 8 cell 89.21WH
Working time on battery:	230min depends of version
Size:	419(W) x 293(D) x 39.3~49.7(H) mm, weight 3,9 kg with battery + 1,3 kg power adapter
CD/DVD:	DVD DUAL SuperMulti
Operating System:	No
Flash Card Reader:	9-in-1 (MMC/RSMC/SD/miniSD/SDHC/SDXC/MS/MS Pro/MS Duo)
GPS:	No
TV Tuner:	No
Color:	Black
Other:	One NVIDIA 3D Vision 2 shutter glasses

Product from the Archive - production finished

Founded in 1983, **CLEVO** has achieved a fine reputation as a developer and manufacturer of notebook computers. Due to our product positioning in the high-tech market, Clevo has won many awards in computer product evaluation conducted throughout the world.

CLEVO[®]

With intelligent performance that accelerates in response to demanding tasks, such as playing games and editing photos, the Intel® Core™ i7 third generation processor moves faster when you do.

The Intel® Core™ i7™ processor automatically allocates processing power where it's needed most. Whether you're creating HD video, composing digital music, editing photos or playing the coolest PC games — with the Intel® Core™ i7 processor you can multitask with ease and be more productive than ever.

Selected: Longlife LED technology. Backlit display (LED, Light-Emitting Diodes) ensures an even and uniform light across the screen. LED backlighting offers many advantages: low operating voltage, therefore low energy consumption and prolongs battery life, precise control of light intensity, longer than traditional displays of component life, finally – not less important – protecting the environment.

Wide Screen: Wide Screen is an important feature. Wide Screen makes the display look bigger. The 16:9 aspect ratio is the most popular. Movie theaters and high end home televisions all display in 16:9 wide screen ratio just like these do. This has a backlit display for extra brightness. The monitor will look good during day or night. You can adjust all the color and picture settings (color, contrast, brightness, etc).

Try a new laptop **CLEVO P370EM3** to get free from ghosting **3D** images in Full HD (**Full HD**). P370EM3 has integrated support for **NVIDIA 3D Vision2**. **Play** over 600 games in 3D on the PC including the latest titles like Batman: Arkham City, Crysis 2 and LA Noire.

Discover the difference **NVIDIA 3D Vision® 2** can make in your gaming experience. The new gamer-inspired glasses have 20% larger lenses to give you the most viewing area with the least light leakage. They also work great with the innovative **NVIDIA 3D LightBoost™** technology, which makes your screen up to 2x brighter¹ for better 3D gaming and video viewing. Plus, 3D Vision 2 glasses are built from state of the art, softer materials designed to deliver more comfort and better fit.

NVIDIA GeForce GTX 680M

The NVIDIA® GeForce® GTX 680M is the fastest, most advanced gaming notebook GPU ever built.

mobikator.pl

The NVIDIA GeForce GTX 680M leverages NVIDIA's revolutionary new architecture to deliver up to 60% more performance than the previous generation*. Built for speed and efficiency, the GeForce® GTX 680M GPU outpaces the competition by up to 30%*. Plus, NVIDIA GeForce™ drivers ensure that you're always getting the most out of your GPU for the ultimate gaming experience.

mobikator.pl

[go top...](#)

NVIDIA® CUDA™ technology unlocks the power of the GPU's processor cores to accelerate the performance for even the most demanding system tasks such as video transcoding. The HDMI lets you play games the way they're meant to be played without having to worry if your video card is up to the task.

NVIDIA® Optimus™ technology intelligently optimizes your notebook PC, providing the outstanding graphics performance you need, when you need it, all the while extending battery life for longer enjoyment.

[go top...](#)

NVIDIA® SLI™ intelligently scales graphics performance by combining multiple GeForce GPUs on an SLI™ certified motherboard. With over 1,000 supported applications and used by over 94% of multi-GPU PCs on Steam, SLI™ is the technology of choice for gamers who demand the very best.

NVIDIA® PureVideo® technology brings movies to life. PureVideo uses advanced techniques found only on very high-end consumer players and TVs to make Blu-ray, HD DVD, standard-definition DVD movies, PC and mobile device content look crisp, clear, smooth and vibrant.

SSD DRIVES

Inside the laptop are two disk made in Flash SSD (Solid State Disc) technology. This means that they has no moving parts inside. Disk reads and writes data 2 times faster than standard 2,5" disks. In addition, it does not heat up at all, consuming little energy and discharge CPU up to 10%. Computer witch SSD drives runs much faster.

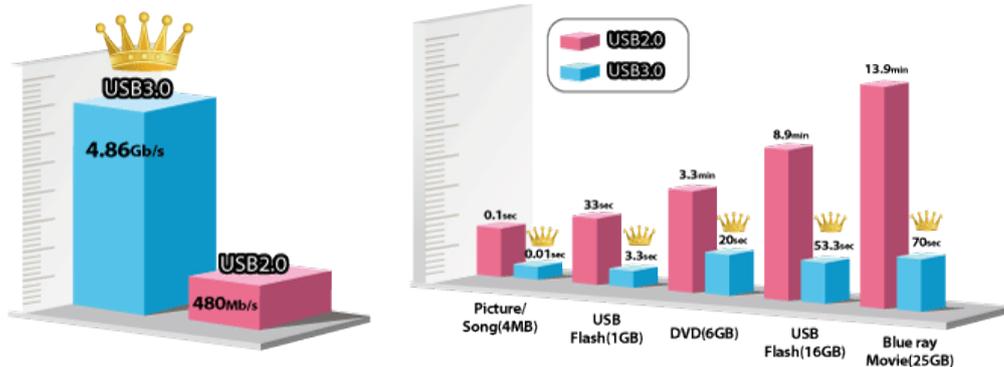

Laptop is also equipped with third ultra-fast SSD disk using mSATA connector. In addition, to the computer can be connected another devices via an external eSATA connector.

Get more with your HDDs thanks to RAID technology. RAID 0 joins physical drives into a single logical drive which allows you to better use of space. With RAID 1 your data will be safer because one disk is an exact copy of the other. Even if one disk fail all data will still be available on the second disk. With RAID 1, data reading accelerates almost twice.

The CLEVO P370EM is equipped with the latest USB 3.0 technology that can deliver transfer speed up to 10 times faster than USB 2.0. This allows faster transfer of HD content. USB charging is also faster - port provides a 900mA current, offering power saving features by switching to standby mode on unused devices, or turning them off.

Clevo P370EM is richly equipped with various kinds of I/O Connectors:

- 4 x USB 3.0 (1 x 900mA USB)
- 1 x eSATA (USB 2.0 combo)
- 1 x Display port
- 1 x HDMI™ out (with HDCP)
- 1 x Headphone jack
- 1 x Microphone jack
- 1 x S/PDIF output jack
- 1 x Line-in jack
- 1 x RJ-45 LAN port
- 1 x DC-in jack

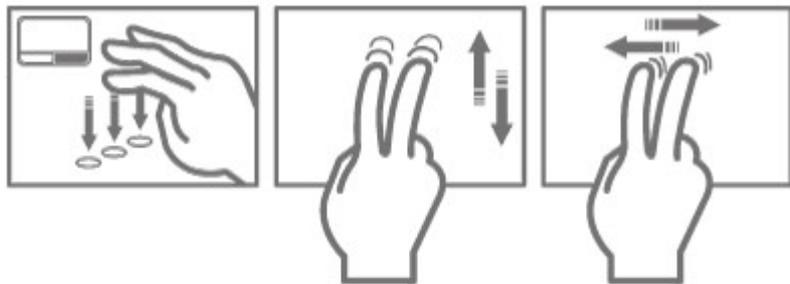

The Trusted Platform Module (**TPM**) is a microchip that enables your computer to take advantage of advanced security features, such as **BitLocker** Drive Encryption. CLEVO with the TPM can **create encryption keys** that can only be decrypted by the same TPM. The TPM "wraps" encryption keys with its own storage root key, which is stored within the TPM. Storing the storage root key in the TPM microchip, rather than on your hard disk, offers **better protection** against attacks designed to expose your encryption keys. The integrated multi-gesture touchpad on the notebook allows user to perform various operations by tapping **multiple fingers** and making gestures.

When using a computer touchpad can accurately detect multi-finger movements. Using touchpad is not only effective but also enjoyable. When you start a computer that has a TPM and has BitLocker enabled, the TPM **checks** the operating system for conditions that could indicate a security/risk. These conditions could include changes to the basic input/output system (BIOS) or other startup components, or an indication that the hard disk has been removed from this computer and is being started in a different computer. If the TPM detects one of these security risks, BitLocker keeps the system partition locked until you enter a BitLocker recovery password to unlock it.

No need for cables or connections! Thanks to the bluetooth® 3.0 technology that allows the exchange of information among different devices, you can easily use all the accessories of the Clevo line (and more) with an in-built special software. Bluetooth 3.0 is much more faster than previous versions of this interface.

Thanks to the Wi-Fi technologies to wireless connect to the Internet both in professional and domestic settings through the public or private hot-spots, make your Clevo an inseparable resource for your daily activities. New "n" standard provides great transfer up to 150Mbit/s. This feature allows you to download and upload data in short period of time.

Enjoy your communication and take advantage of the built-in video camera to participate in a video conference or simply chat with your friends face-to-face no matter how far apart you may be. Thanks to the 2.0 megapixel high-resolution camera, your video will have never looked so real.

CLEVO P370 takes mobile entertainment to the next level! The fastest notebook with 17.3" screen made until now. P370EM offers newest third generation Intel Core i7 mobile processors and one of the best nVidia GeForce graphic card - GTX 680M.
