## Product from the Archive - production finished

Archos Tablet 70 is an amazing tool that lets you enjoy browsing and casual work on the Internet. 7-inch multitouch screen, it provides a lot of fun, and is complemented by the only access to numerous multimedia applications including Flash.

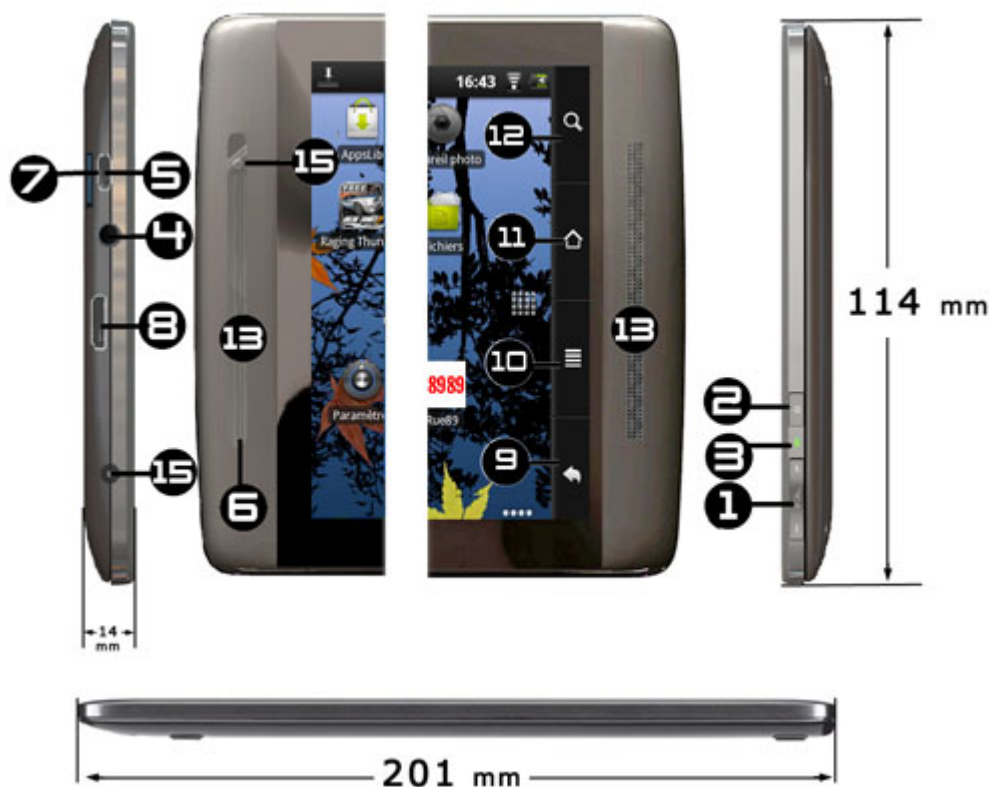

The miniaturization of processors gave the option of constructing a super-light and thin tablet. ARM Cortex A8 processor provides exceptional performance in such a small device which is the Archos 70 Internet Tablet. You can view high quality photos, videos and music. The fast processor allows you to watch movies in HD and the launch of 3D games.

### Thin, light and strong

[go top...](#)

**ARCHOS 70 Internet Media Tablet thinnest and lightest thanks to the modern plastic patented by Archos. Tablet owes its strength to a complicated Internal crafted in stainless steel. The use of steel frame and plastic increased the overall strength of the structure thereby giving device stylish shape.**

[go top...](#)

Archos Internet Tablet is equipped with wireless communication systems, WiFi (802.11 b / g) and Bluetooth 2.1. Expansion of the exploding growth of WiFi - wireless Internet access has led to the possibility of using this technology in the home and office. Using the ever-growing number of hot-spot access - the user Archos 70 tablet can be continuously connected to the Internet from home, your office. Implemented wireless technology gives you the freedom to choose Internet connectivity virtually anywhere, anytime.

## System Google Android

Google Android 2.2 system makes it possible to fully support Flash 10 applications (games, video, photo galleries). MID check up perfectly as portable movie player, music files or photo viewer. The main advantage of Android is the easy of use.

Search or simply browse through the Android Market to see incredible selection of games and applications available for download. If you like to chat with friends, you certainly need Skype. For fans of social networking solutions such as Twitter, Facebook, Wordpress, and YouTube!

## Citive multitouch screen

[go top...](#)

The wide 7" touchscreen combined with a G-sensor lets you experience a never-seen-before viewing quality. The 800 x 480 pixels high-resolution display is so sharp that you can fully enjoy your pictures' smallest details. In addition to the HD resolution, the 16:9 format is just perfect for rendering all your videos in the best quality.

## HD i HDMI

HDMI is a digital interface for audio / video signal is able to send a full stream of data without compression. Video data is transmitted from the TMDS technology. HDMI allows you to connect any, is compatible with standard equipment. Due to the presence of the connector in Archos, it is possible to connect the TV stand, which is equipped with HDMI input. This gives the ability to display photos and videos on the big screen. There also does not preclude the Archos 70 connect to an external monitor.

Playing movies in HD (720p) is no problem. Functions of multimedia devices can be extended by installing additional software on dedicated system Google Android.
