

MobiPad C50 - Additional battery

Category:	Batteries
Manufacturer:	Mobikator

Product from the Archive - production finished

A thin 4500mAh removable li-Ion battery acts as the back of the MobiPad. Power management is impressively optimized, as a single charge (3.5 hours for 85% charge, 5 hours for full charge) provides up to 6 hours of operational time. Actual runtime varies according to usage and settings, of course, but the estimates are pretty accurate.
