## Resistance IP64

Degrees of IP is a classification of different degrees of protection of electrical equipment that are provided by enclosures of the unit according to PN-92/E-08106. A number after the "IP" is really two digits. The first is protection of human and animal access to hazardous parts and protection against contamination, such as dust. It's mainly about access foreign objects to enter the unit. The second digit is protection against water.

### The first digit [x]

Protection against solid objects

No special protection

0

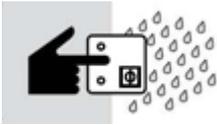

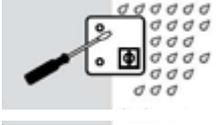

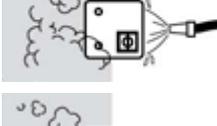

### The second digits [y]

Protection against liquids

0

No waterproofing

Protection from solid objects greater than 50mm in diameter	1		1	Protection from dripping water
Protection from object not greater than 12mm in diameter	2		2	Protection from vertically dripping water (tilted)
Protection from object not greater than 2,5mm in diameter	3		3	Protection from sprayed water (tilted up to 60°)
Protection from object not greater than 1mm in diameter	4		4	Protection from splashed water
Complete protection against contact, Protection against dust deposit	5		5	Protection from water projected from a nozzle
