Product from the Archive - production finished

Founded in 1983, CLEVO has achieved a fine reputation as a developer and manufacturer of notebook computers. Due to our product positioning in the high-tech and niche market, we have won many honors in computer product evaluation conducted throughout the world.

Breath-taking graphics generated by a state-of-the-art engine come alive only when displayed in stunning full. The **W110ER** 11.6" **LED** display technology delivers the most brilliant color and contrasts that will dazzle your eye whether you're watching a HD movie or playing a game.

LED backlit display (LED, Light-Emitting Diodes) ensures an even and uniform light across the screen. LED backlighting offers many advantages: low operating voltage, therefore low energy consumption and prolongs battery life, precise control of light intensity, longer than traditional displays of component life, finally - not less important - protecting the environment.

Wide Screen display is a very important feature. Wide Screen makes the display look bigger. The 16:9 aspect ratio is the most popular. Movie theaters and high end home televisions all display in 16:9 wide screen ratio just like these do. This has a backlit display for extra brightness. The monitor will look good during day or night. You can adjust all the color and picture settings (color, contrast, brightness, etc).
