Product from the Archive - production finished

Founded in 1983, **CLEVO** has achieved a fine reputation as a developer and manufacturer of notebook computers. Due to our product positioning in the high-tech and niche market, we have won many honors in computer product evaluation conducted throughout the world.

A NEW LEVEL OF PERFORMANCE

A new dimension in the quality of dual-core processors from Intel. The use of such a powerful processor performance guarantees at a level that websites will not run fast,

office programs Word, Excel, etc. will process the data quickly, the film in HD will work without any jams.

Combining technology with a fast 64-bit data bus speed of information processing several Gigatesli per second, and this low power consumption processor creates highly efficient, energy-efficient at a low price.

Semiconductor LED-backlit display (LED, Light-Emitting Diodes) ensures an even and uniform light across the screen.

LED backlighting offers many advantages: low

operating voltage. Therefore low energy consumption and prolongs battery life, precise control of light intensity, longer than traditional displays of component life, finally - not less important - protecting the environment.

Wide Screen display is a very important feature.

Wide Screen makes the display look bigger. The 16:9 aspect ratio is the most popular. Movie theaters and high end home televisions all display in 16:9 wide screen ratio just like these do.

This has a backlit display for extra brightness. The monitor will look good during day or night. You can adjust all the color and picture settings (color, contrast, brightness, etc).

ENHANCE PERFORMANCE WITH MEMORY DDR3

Your system's performance will never disappoint thanks to the latest DDR3 1066MHz/1333MHz/1600MHz system memory providing greater memory bandwidth for performance that will never lag behind.

Amazing speed with the disk SSD

...ology Flash SSD (Solid State Disc). This means that it has no moving parts and only the same electronics. A 2 times faster reads and writes data in relation to standard disks 2,5".

The... W2511LQ is... equipped with the latest USB 3.0 technology that can deliver transfer speed up to 10 times faster than USB 2.0 native support.

The great expansion of WiFi technologies to wireless connect to the Internet both in professional and domestic settings through the public or private hot-spots, make your Clevo inseparable resource for your daily activities.

Thanks to the bluetooth technology that allows the exchange of information among different devices, you can easily use all the accessories of the Clevo line (and more) with an in-built special software.

Thanks to the in-built UMTS/HSPA module, you need only to insert a SIM card in the special slot, and you will immediately be able to easily connect to the Internet. The integrated software is able to automatically recognise and customise all network providers worldwide. Besides, it allows you to reach the highest connection speeds even in poor network conditions.

Enter the world of online communication and take advantage of the built-in video camera to participate in a video conference, or simply chat with your friends face-to-face no matter how far apart you may be. Thanks to the 1.3 megapixel high-resolution camera, your video will have never looked so real.
