**Windows Vista Home Premium is the edition that delivers more ease of use, security and entertainment to your PC at home and on the go**

Here it is: The preferred edition of Windows for home desktop and mobile PCs. Windows Vista Home Premium delivers the productivity and entertainment that you need from your PC at home or on the go. It includes Windows Media Center, and that makes it easier to enjoy your digital photos, TV and movies, and music. Plus, you'll have the peace of mind of knowing that your PC has a whole new level of security and reliability. All together, Windows Vista Home Premium redefines enjoyment in home computing.

It starts with a breakthrough design that makes your PC easier to use every day. With Windows Aero, you'll experience dynamic reflections, smooth-gliding animations, transparent glass-like menu bars and the ability to switch between your open windows in a new three-dimensional layout. Instant desktop search capabilities and new ways to organise your information mean that you can instantly find and use the emails, documents, photos, music and other information you want.

Windows Vista Home Premium also helps keep your personal information, your PC and your family computing experience safer than in previous versions of Windows. For example, Windows Internet Explorer 7 in Windows Vista includes automated defenses against malicious software and fraudulent websites so you can use your PC online with greater confidence. Windows Vista Home Premium also provides automatic backup of your files, such as your valuable digital photos, music, movies, documents and other files, so you can relax and focus on the things you care about most. And, by using the built-in parental controls, parents can help ensure their children's computer use is appropriate and safer.

And what about fun? A major advance in Windows Vista Home Premium is the dramatically improved digital entertainment experience. Windows Media Center makes it easier to organise and enjoy photos, music, DVDs, recorded TV and home movies. Enjoy the entertainment on your PC or even on your TV in the living room with an Xbox 360 wirelessly networked to your PC<sup>1,2</sup>. Windows Vista Home Premium makes it easier to burn your photo slide shows and home movies to a professional-looking video DVD that your friends and family can watch on a DVD player or PC whenever they like. Combined with unbeatable support for gaming and music, Windows Vista Home Premium delivers a complete home entertainment experience.

If you want a PC that can keep up with you while you're on the go, then you'll appreciate how Windows Vista Home Premium helps you get the most from your mobile PC. It provides simplified power management, easier wireless networking and streamlined ways to sync with the devices that keep you connected. Because it's incredibly flexible, you can even draw and write by hand on a Tablet PC, and enjoy all of your entertainment through Windows Media Center when you're on the road, in a coffee shop or relaxing on the couch. Mobile computing has never been like this before.

Finally, Windows Vista Home Premium makes it easier than ever to set up and maintain your new PC. There are new features that make it easier to transfer all of your data and settings from your old PC to your new one and technology that helps keep your system running quickly and reliably.

Whether you're balancing your chequebook, studying for school on your mobile PC,

watching a downloaded or recorded movie at home, or sharing your favourite photos with friends on a custom DVD, the experience is much better on a PC running Windows Vista Home Premium.
