2D Scanner	2D Honeywell N6603

Dustproof industrial tablet was equipped with high performance, energy-efficient

MT6763 processor. Inside, there are eight cores that allow for more efficient processing of multiple tasks simultaneously. Shared caching, which uses a multi-level hierarchy, is dynamically allocated to each processor core according to the load. This reduces the average access time to main memory.

### Dimensions

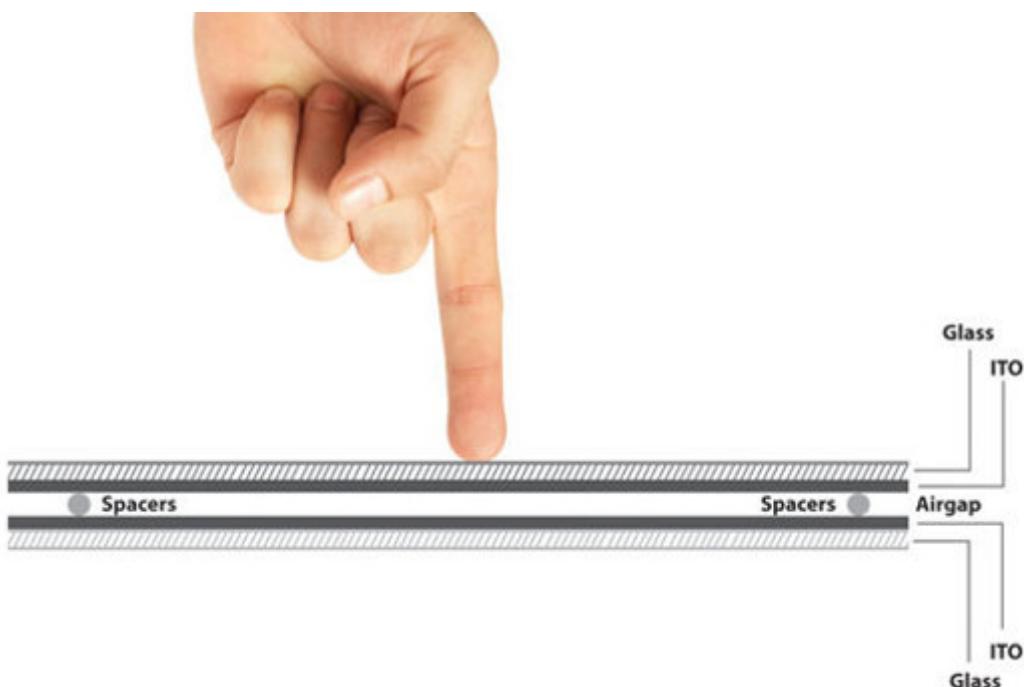

Industrial Data Terminal Speedata SD55 is designed for resistance and convenience. The sleek and rugged 15mm thick design and stylish case will make the tablet very well suited for industrial use and more. The unique size has been carefully thought out to make the device more comfortable and ergonomic. The non-slip casing makes it safe and secure to hold it in your hand, and the rubber corners further protect your device against possible

damage as a result of falls.

<b>Dimensions</b>	150 x 72,5 x 15mm
<b>Net weight</b>	240g (with battery)

Capacitive screen

With the capacitive screen, the reaction of the device is not to directly press the screen, but to change the electrostatic field at the point where the device is touched. This allows for much more precise handling and gentle brushes on the screen. In addition, we can use multitouch technology, the ability to control our tablet a few fingers at once.

**RESISTANCE**

### IP65 Protection

The IP standard defines the degree of protection provided by the enclosure of an electrical device against such factors as: access to dangerous parts inside the enclosure, penetration of foreign matter, splashing or immersion.

<b>IP6X</b>	Complete protectionm against contact, Protection from infiltration of dust
<b>IPX5</b>	Protection from water projected from a nozzle

### 1.5m drop resistance

Specially designed construction gives the machine a chance of accidental falls from up to 1.5 meters in operating mode, even on hard surfaces. In addition, the tablet screen is protected by specially tempered glass Gorilla Glass.

### Extreme temperatures

Speedata SD55 is suitable for continuous operation in both low and high temperatures in the range of -20°C to 60°C. When the device is off, it can handle temperatures ranging from -30°C to 80°C. In addition, the rugged industrial tablet performs well in rooms with increased humidity, ensuring proper operation even with 95% relative humidity.

<b>Working Temp.</b>	-20°C do 60°C
<b>Storage Temp.</b>	-30°C do 80°C
<b>Humidity</b>	5% - 95% (Non-Condensing)

## DATA COLLECTING

### NFC

Short-range communication, known as NFC, is a radio communication standard that allows for wireless data exchange at a distance of a few centimeters. This technology is a simple extension of the proximity card standard that combines smart card interface and reader in one device. NFC devices can communicate with existing equipment in the standard ISO / IEC 14443A/B (cards and readers) as well as with other NFC devices, and thus are compatible with existing and already used public transport and payment infrastructures such as MIFARE.

### Barcode scanner

Barcode Reader allows you to read, decode and transfer stored data in

barcode to your computer. Thanks to dynamic scanning method and the large range of reading, tablet is capable to carefully collecting data, which helps to increase the rate and efficiency of work. Simplified installation procedure, convenient and intuitive design allow to start scanner work very easy and quickly.

<b>2D Scanner</b>	2D Honeywell N6603
<b>Support codes</b>	1D: Codabar, Code11, Code32, Code39, Code39, EAN-8, EAN-13, GS1-Databar, Interleaved 2of5, Martx 20 2D: Aztec, Composite, DataMartix, MaxiCode, MicroPDF 417, Micro QR Code, PDF 417, QR Code, RSS, TLC

## WIRELESS COMMUNICATION

4G Module

4G technology is based on a radio network with fast transmission and the rare

occurrence of downtime or transfer errors. The main distinguishing feature of the 4G from its predecessor (3G) is the speed of transfer between devices. The fourth generation network offers 100 Mb / s of mobile internet speed and 25 Mb / s of packet transfer. Technology enables users, including: extremely fast radio networks, Internet access, personalized telephony, and access to modern media and games services.

<b>4G Module</b>	<u>LTE</u> : 1/2/3/4/7/17/20/38/39/40/41
<b>3G Module</b>	<u>GSM:</u> 2/3/5/8 <u>WCDMA:</u> 1/2/5/8 <u>TD-SCDMA</u> : 34/39

### GPS Navigation

Mobile terminal  
MobiPad U93  
is equipped with a professional GPS module with combining low power consumption with high accuracy. Navigation is fast and smooth, allowing you to easily and easily reach any destination.

### Bluetooth 4.0

Bluetooth enables wireless short-range communication between various electronic devices, such as the keyboard, computer, laptop, palmtop, mobile phone and many others. In the fourth version of this standard, energy consumption was reduced considerably, at the expense of lower transfer costs, and real operating coverage increased.

## Wi-Fi network

Dual-band Wi-Fi provides fast network access wherever you can connect to secured or open Wi-Fi networks. This is a convenient solution for people who have a work or residence router and a wireless network that can be used at no extra cost. The shock-resistant industrial tablet is equipped with the latest 802.11n technology, which allows file transfer speeds up to 300 Mb/s.

<b>Standards</b>	802.11(a/b/g/n)
<b>Frequencies</b>	2.4GHz + 5GHz (Dual-Band)

## APPLICATION

### Trade and Services

Thanks to their size and light weight, tablets are a useful tool for sales representatives. Today's applications running under the tablet system enable even entering the tablet's contractor database, which allows us to later search for it quickly by name or NIP number. We can do the same with our commodity base, which can work in parallel with the database of contractors. Additional use of tablets in the trade, such as sending orders or invoices directly to the company through the GSM network or Wi-Fi.

### Industry and Construction

Industrial tablets are characterized by high resistance to adverse working conditions. Tightness, dust and water resistance of enclosures, certified by IP (dust and water resistance standards).

## Warehouse

An industrial data sheet is the ideal solution for quick stocktaking. In addition, depending on the software used, it streamlines the process of entering and delivering goods into the warehouse, enables price control and dispensing, helps to collect and order orders, and identifies customers and servicing the rental. The advantages of using tablets are undoubtedly: time savings, customer satisfaction thanks to the correct price and speed of operation.
