

Touch Headrest Audio/Video - AV

Manufacturer: Southking

Product from the Archive - production finished

Southking company was founded in 2000, which is expert to produce car series products such as car DVD, Monitor, GPS ,Car Bluetooth Mirror and car security products. We have 11 years of experience at developing visual and audio products. We are devoted to designing, manufacturing state of the art, high quality, and affordable products for the international market.

Head restraints Southking company are the most advanced solutions. Putting so many devices in one small headrest makes the rear of our car seats are becoming home theater or living room playing video games.

This model has a real 7" screen touchscreen. Other manufacturers right 7" but use 6" screens with a big frame around them. This is a true 7" screen. This size is very popular because it is a great price point, and it also will look great in any vehicle. Some of the really big sizes do not look as good. The resolution is so high on this model that it makes the screen look even bigger than it is.

Wide Screen display is a very important feature. Wide Screen makes the display look bigger. The 16:9 aspect ratio is the most popular. Movie theaters and high end home televisions all display in 16:9 wide screen ratio just like these do. This has a backlit display for extra brightness. The monitor will look good during day or night. You can adjust all the color and picture settings (color, contrast, brightness, etc).

Built in IR transmitter

[go top...](#)

This monitor has a built in IR Transmitter so you can transmit the audio signal to any of the optional wireless headphones available in our store. What is great about this model is that the IR transmitter has dual IR sensors in each monitor so you get a strong signal to the wireless headsets.

FM Wireless transmission

Built-in headrests (optional with DVD) transmitter to send audio via FM to your car radio so that everyone could hear the same music or movie.

Support headrest is "fabulously" simple, remote control that is included with each headrest.

Headrest have only one button on/off. Built-in touch screen interface provides easy control of all device options like: brightness, calibration, volume, etc.

Fully universal

[go top...](#)

The distance between the 2 poles of the headrest monitors adjust left to right so that these can fit in any vehicle. What makes these fully universal though is that these include(3) sets of pole adapters to fit the pole diameter in any vehicle.

Headrest is made of ecological leather (optional - natural leather) in three colors: black, gray and beige. Match to any car. The AV in/out is responsible for the signal delivered or made available to the second headrest. The input signal can be camera, TV tuner, etc.

Multi transmission

A/V Inputs means you can hook up 2 devices to the monitors right out of the box. This means you can hook up a DVD player, and any other audio/video device to these monitors at the same time. You can switch between A/V input 1 and 2 directly from the monitor or from the remote.

Curtain is made of thard plastic headrest protects against damage. Allows easy removal of the headrest take to home protect it against steal.

Technical data

LCD size	7"
Resolution	800 x 480
Active area	154.08 (W) x 85.92 (H)mm
Backlight mode	LED
Luminance	250 cd/m ²
Contrast ratio	500 : 1
Touch panel size	7"
Input method	By finger or pen / remote
Chattering time	do 10ms
Video system	NTSC / PAL (auto switching)
Input	AV input
Output	AV output
Audio transmission	FM / IR
Dual channel IR frequency	
- A channel	2.3MHz / 2.8MHz
- B channel	3.2MHz / 3.8MHz
Operation voltage	DC 10 - 16 V
Power consumption	12V 1.5A (version with DVD) 12V 1A (version with DVD)
Operation temperature	-20C do +70C
Color	Black, Grey, Beige
Complect (set)	1x pilot, 1x headphones, 1x Headrest with AV, wirings, montage
